TAKE THE
AIR OPTIX® AQUA MULTIFOCAL
CONTACT LENSES TEST INSIDE

DISCOVER AIR OPTIX® AQUA MULTIFOCAL CONTACT LENSES

If you're approaching or over the age of 40 and reading newspapers and menus at arm's length, there's no cause for alarm. You probably have presbyopia, a common condition that affects the eyes' ability to focus on near and intermediate objects. Fortunately, there's a solution—New AIR OPTIX® AQUA MULTIFOCAL contact lenses.

How do you score?

Try reading each of the four lines below at normal reading distance. If any of the words appear out of focus or you need to extend your arms, you may be exhibiting the first signs of presbyopia. Put a check in the square of the first line you can't read, and talk to your eye care practitioner about getting your first month FREE!

14-point 20/100
Can't read this clearly?
You're probably a candidate.

12-point 20/80
Remember—normal reading distance and no squinting.

8-point 20/50
Do these words appear blurry? Don't worry—you have plenty of company.

4-point 20/25
If you can read this line clearly at normal reading distance, you are not yet experiencing near vision problems associated with presbyopia.

Talk to your eye care practitioner and ask about a **FREE* one-month* trial pair** of AIR OPTIX® AQUA MULTIFOCAL contact lenses.

See how natural they feel.

AN ADVANCED COMBINATION OF OXYGEN AND MOISTURE FOR A HEALTHY, NATURAL FEELING

Moisture and oxygen are the two essential elements your eyes need to stay comfortable when wearing contact lenses. AIR OPTIX® AQUA MULTIFOCAL lenses give you plenty of both.

- Allow up to 5 times more oxygen through the lens than traditional hydrogel multi-focal contact lenses for white, healthy-looking eyes
- The AQUA Moisture System for comfort on contact, all day, every day
